Part 3: 9-11 served a multitude of purposes

Pop Goes the Bush Mythology Bubble: Part 3

Online Journal

Karl W. B. Schwarz

December 17, 2004

In Part 2 it was disclosed that there are some serious deficiencies in the Official Bush Story regarding 9-11 and that Canadian firms might be the source of certain types of training and software that made 9-11 possible. Furthermore, it was disclosed by a source that came to me that there was a $120 billion "due bill" that matured on Sept. 12, 2001, and was due on the next day. The office of Cantor Fitzgerald was totally destroyed on September 11, 2001 and its only survivor was CEO Howard Lutnick who was lucky enough to not be in the WTC 1 North Tower offices.

The Chinese have an interesting saying that fits what is going on today in America: "When the whales battle, the shrimps suffer." The Chinese have another interesting saying: “Wei Ji” that translates “Danger = Opportunity”.

The source for such information that has been brought to me (because of my writings) used to work for the federal government and is a specialist in detecting "Trojan Horses" that are financial scams designed, placed and intended to defraud either investors or large banks, or, in some instances, entire nations. They are used as a form of Financial Terrorism that I write about in my book, ‘One-Way Ticket to Crawford, Texas’. Such “nesting doll arrangements” are also how large amounts of money is laundered whether that be criminal activity, drug money, government corruption, or greedy people.

Not only have I come forward with some people that provided me with intelligence and hard facts, but there is also a Mr. John Perkins, a former NSA (National Security Agency) recruit that was placed in a private company to wreak financial damage and the equivalent of financial terrorism on smaller nations to take over their assets for American empire-building, much like Bush is doing in Iraq at this time. Mr. Perkins has written a book about his past sins, titled ‘Confessions of an Economic Hit Man’, and what he discloses in that book is entirely consistent with what I am disclosing in this Pop Goes the Bush Mythology Bubble series.

Even Mr. Perkins confirmed to me in a telephone call that Brady Bonds are part of a bigger strategy to defraud smaller nations. When Washington, DC, speaks of "rule of law" do not hold your head up high, instead bend over and puke because of the despicable liars we have in our nation's capital. They are out plundering other nations on behalf of their wealthy contributors and in the end, shaming all of us and drawing contempt and hatred towards all of us.

They are plundering and ruining the lives of hundreds of millions worldwide, so they can thump their chests and boast of their deeds that are mere thievery and willful intent to defraud at best.

According to my Trojan Horse expert, there were actually two illegal, bogus, and fraudulent schemes in play at the same time on 9-11-2001. The first being a $120 billion transaction based on Brady Bonds and bogus gold collateral certificates that involves, according to our sources, George H. W. Bush, Lloyd Bentsen, James A. Baker, III, and other insider players.

For clarification's sake, just refer to them as Faction 1 and note that they are all insiders, influence pimps and Republicans except for Bentsen, but he is from Texas where oil and politics is about as screwed up as this world gets. Then on the other side of the aisle we have Faction 2 that are insiders, influence pimps and Democrats by the name of William J. Clinton, George Soros, CFR, the GAIA / Ekker folks that were disclosed in the Part 1 of this series, and add in Marc Rich and Israel to Faction 2. It is open to debate, and evidence, how William F. Browder and his Hermitage Capital figures into Faction 1 or Faction 2 or both.

Gosh, what a tangled web they weave with their deceit, greed and power games in DC. I can smell the blackmail all the way down in Little Rock, the DC stench is so strong.

The first of these bogus $120 billion deals originated out of Israel, so now maybe you can better understand why Congress is attempting to change U.S. law to where criticism of Israel is against the law and there is currently a purge in the State Department and CIA of anyone who dared to question the "Attack Iraq to Defend Israel" policy. Yes, let's criminalize it to call a thief a thief.

In Parts 1 and 2, I exposed that the 9-11 Commission had so many conflicts of interest that the only possible end result was conflicted, as in cover up.

Evidently the Inter-American Investment Corporation is such a sweetheart scam for the Bushoids that the Clintonoids wanted in on it too and when Clinton was in office, they took full advantage of the opportunity. Evidently somewhere along the way the Ekkers changed sides from the Bush "Scam America" Team and went with the Clinton "Scam America" Team. Evidently since GHWB ran Iran-Contra through Arkansas, Clinton had enough information to either weasel his way in or set up a parallel operation, bogus and illegal of course.

It is this Ekkers-GAIA group that has been placing bogus gold certificates and doing so in very large numbers. Over $10 trillion according to our source and an independent gold trading source verifies that as well. This is all made possible by using the moniker of Inter-American Investment Corporation ["IIC"] and Global Alliance Investment Association ["GAIA"]. What they are doing is using the Peru Bonus 3392-181 that does not belong to either IIC or GAIA to achieve this bogus and illegal end, and it certainly does not belong to either Bush or Clinton.

We Americans have higher standards than these scumbags and it is time to clean house and flush the toilet in DC. What they are doing is using the Peru Bonus 3392-181 mentioned below that does not belong to either IIC or GAIA to achieve this bogus and illegal end.

"The amount involved in this transaction was 'non-authorized use of the Gold Collateral Interest (U.S. Debt) on BONUS 3392-181.'"

Simply put, someone, some group, owed $120 billion on 9-12-2001 and the deal up and vanished, the debtors walked away scot-free and the creditors offshore banks, took major hits.

This all makes perfect sense as to why George W. Bush would want to slap "TOP SECRET" on all matters including back to the days his father was CIA director and later vice president in the Reagan administration. One of my recent articles disclosed that the plot to take over Iraqi oil did not start when Bush came to office, it actually started way back in 1982 or 1983 at least, so we have some baggage in the Bush White House due to past and present misdeeds.

I keep reminding folks to back up and pay attention to what FBI Translator Sibel D. Edmonds made public and Bush, Cheney and Ashcroft slapped a gag order on her immediately.

She found and pay close attention this time if you did not last time or this is the first time you have heard this,

"drug trafficking, money laundering, foreign names and AMERICAN NAMES involved in the financing of 9-11."

Additionally, what she found did not come from "counter-terrorism" (Richard Clarke's group), it came from ongoing FBI investigations that have been in progress since 1998, during the Clinton administration.

Then out of Germany an attorney named Stefan Grossman hit on yet another "foreknowledge" evidence trail that suggests that many were in the know about 9-11 happening. Mr. Grossman uncovered that the insurance riders on the World Trade Center (WTC) towers 1 and 2 had apparently been increased in June or July 2001 from somewhere around $1.05 billion to the neighborhood of $4 billion.

Reportedly the beneficiaries of these serendipitous "three times the payout" insurance riders" are Henry Kissinger of Kissinger McLarty Associates, Peter G. Peterson of Blackstone Group and Maurice Greenberg of AIG. Wouldn't that be a hoot but of course, they knew nothing about the 9-11 "attacks" being on the day's agenda.

Some of you may remember a 1991 quote attributed to Kissinger at the 1991 Bilderberger meeting in Evians, France, that went something like this:

"Today, America would be outraged if U.N. troops entered Los Angeles to restore order. Tomorrow they will be grateful! This is especially true if they were told that there was an outside threat from beyond, whether real or promulgated, that threatened our very existence. It is then that all peoples of the world will plead to deliver them from this evil. The one thing every man fears is the unknown. When presented with this scenario, individual rights will be willingly relinquished for the guarantee of their well-being granted to them by the World Government."

You know what, Henry, I frankly don't give an iota what you think or your New World Order vision of Fascism and let's all march to your goose-step. How about: NO WAY, Henry! Do you understand both of those words used together?

But of course, McLarty of Kissinger McLarty Associates is none other than Thomas F. 'Mack the Knife' McLarty of the Clinton administration infamy and formerly of Little Rock, Arkansas and former CEO of Arkla Gas. I have personally met with this sawed off Rat Bastard and was not impressed.

The documents for that bogus $120 billion closing were reportedly housed in WTC 1, and gosh, that company took a 737 right in the face. Consider that, and consider that no one is that lucky to get off scot-free because a 737 showed up to bust up the deal.

My sources inform that Cantor Fitzgerald was the underwriter/bond trustee on the $120 billion payment that was due. It may have been another firm, but my sources say Cantor Fitzgerald, WTC 1, floors 101-105.

Out of the blue, a new source came forward with information that in 1989 there was a plan being designed and priced to put up scaffolding, take the WTC towers down and rebuild them. The reason stated was not only asbestos related, but also because of a considerable design flaw in the WTC towers involving galvanic corrosion resulting from direct contact of dissimilar metals. In this instance, the heavy exterior aluminum panels were reportedly directly connected to the steel structure of the WTC towers.

The price in 1989 was reportedly $5.6 billion to do this partial demolition and rebuilding to correct what would be a serious design flaw.

If that is the case, there would have been rapid and very damaging corrosion to the steel superstructure due to a process that is called galvanic corrosion. The Statute of Liberty had to be repaired for that same reason where the copper exterior had over time come into contact with the iron skeleton structure inside that makes the shape of the monument, so the process can occur in structures standing in air.

Evidently someone did not want to spend $5.6 billion (1989 dollars) to tear the WTC towers down and rebuild them properly, without the asbestos and without the defect that would rapidly deteriorate the superstructure of the building.

I do not have subpoena powers, but Eliot Spitzer does and some, if not all of the above facts and sets of circumstances warrant being looked into. He is welcome to everything we have on 9-11 matters and the RICO investigations that led to the facts that are presented in my book.

The US government has put their mythology on the table and apparently many (89 percent in the CNN poll) are not buying it. The foregoing may or may not be true, who knows?

It has yet to be investigated and how the trails all started converging on 9-11 and New York City without having to guide them that way might be very telling.
